Polina Kvitka

Frontend Developer

Profile

Due to my interest in development and a love for continuous learning, I've chosen the path of a frontend developer. I don't give up easily on challenging tasks because I see them as intriguing puzzles to solve. Time seems to fly by when I'm solving them. I prefer working in a team as it gives a sense of belonging and offers opportunities to learn from my colleagues. I'm ready to apply my passion for development to help create projects we can be proud of

Employment History

TypeScript Developer at Combined Ratio Solutions, Tbilisi

October 2022 – Present

- Develop code aimed at responding to user actions using algorithms to enhance performance.
- Developed completely new user functionality using TypeScript and Azure Functions on the developing platform. This functionality allows users to process data in the format they need.
- Developed several asynchronous scripts from scratch to handle large volumes of data in a NoSQL database. Through refactoring, I was able to reduce script execution time from several hours to just 30 minutes.
- Writing NoSQL queries to work with the database.

Frontend Developer at iactiv.pro, Remote

June 2023 – September 2023

- Developed the user interface by creating functional React components and conducting testing
- Developed a user interactive interface guide by integrating additional libraries and working with functional React components and the Redux manager.
- Created various animations using libraries such as Framer Motion and react-transition-group.
- Worked closely with the backend team to integrate databases and implement authorization through WhatsApp and other social networks.

Education

Engineer, St.Petersburg State Technological Institute (Technical University

September 2015 – February 2021
